ABOUT

Software Engineer specializing in the design, development, integration, and long-term sustainability of enterprise software systems. Experienced in developing and maintaining enterprise information systems across both the private and public sectors, working with projects of varying scales and complexity. Proficient in the .NET ecosystems, microservices architecture, high-performance and scalable systems, relational and NoSQL databases, and DevOps practices. Focused on building reliable, maintainable, and scalable software solutions aligned with business and organizational requirements.

EXPERIENCE

Software Development Specialist
Ankara Üniversitesi · Ankara · Feb 2026 — present

- Bologna Information System Project (https://bologna.ankara.edu.tr)

Software Engineer
MAPEG · Ankara · Jul 2020 — Jan 2026

- Contributed to full-stack development of the enterprise EMaden web application built with .NET Core and Oracle.
- Participated in code reviews and CI/CD deployment processes within a Scrum-based team using GitLab.
- Improved software quality through debugging, performance optimization, and code refactoring.

Software Engineer
Bekaert · Kocaeli · Nov 2019 — Jul 2020

- Developed Power BI dashboards to visualize production data and support data-driven decision-making.
- Built mobile applications with Power Apps to support manufacturing teams.
- Automated repetitive operational tasks using Power Automate.
- Supported application management, deployment, and traceability using Azure DevOps, Pipelines, and Azure Functions.

CERTIFICATES

- End-to-End SQL Server Training
  Udemy · Jul 2025
- Docker: From Scratch and in Every Aspect
  Udemy · Apr 2025
- OWASP LLM Security Top 10
  BTK Akademi · Nov 2024
- Microservices architecture - .NET
  UDEMY · Aug 2024
- Project Cycle Management - PCM
  Udemy · Aug 2023
